These are the basics, but it's also true that every DAW enables you to go about your music-making business in a slightly different way, and the right software for one person won't be the right software for everyone.. But the fundamentals of the DAW remain the same: fire one up and you can record, arrange, edit, mix and master your music right there on your computer.. Still, even at the end of the century, there were those who scoffed at the idea of a wholly software-based studio, but we don't hear them scoffing now (although, to be fair, they might just be scoffing very quietly).

Yes, there's still something to be said for involving a hardware synth or drum machine in your electronic music-making, but the fact that you can Do It All within a single piece of software is now undeniable.. Sure, we had MIDI sequencing software, which could be used to trigger synths, samplers and the like, but the computer was just one part of a much wider music-making setup.. If you're looking for a Mac that will simply stay put in a studio Music Studio offers a complete music production environment for the iPad/iPhone/iPod Touch with features and a sound quality previously only known to.
