---

We can assist a student in identifying their academic advisor, provide guidance in choosing a major or planning a degree program, help a student interpret College regulations, standards, and policies, and help a student navigate academic concerns.. We are a group of advising generalists who help guide students in a multitude of ways throughout their college experience.

We also assist students with individualized referrals to our campus partners for assistance in academic, personal, and career counseling; academic skills development; and financial aid.. We can assist with navigating external credit and transfer course evaluations, help a student plan for degree completion and we certify all CAS undergraduates for graduation.. The College of Arts & Sciences (CAS) Academic Advising provides professional academic advising and mentoring to CAS undergraduate students.
